

Business By The Sea

Hello Technology Connection,

Thanks for connecting. You would be better served with Omeganomics. The benefits are far beyond what the competition offers. Omeganomics the most disruptive maintenance management product on the market.

This is an introduction to our company, Business By The Sea since the 1970's. We started with over 7,000 medical devices in 1980. Prior to that it was military aircraft using the computerized ASD Program (aircraft statistical data) that gave me insight as what was needed to manage assets. Then it just grew from there. The success of Business By The Sea is because of my connections around the globe since 1979 and innovations in developing maintenance software.

Take a look. This is a real manager & revenue generator. A **"Private Labeled"** product for your company. OMEGANOMICS is an Open Source Integration and Customization tool and is the main benefit that gives you total control and access to thousands of ready made applications. Screens in portrait or landscape views can be created or modified from an existing program in a couple of minutes. The quickest time to develop, check for operation and deploy making Omeganomics customizable, affordable, and a speedy deployment for client server and the web.

Omeganomics has open source applications, data fields, and data files for a much better way to save time, start a business very easily and cost effective.

The Omeganomics PLUS method is coined as Microsoft "DOT NET C# programming where you use the English language to develop your own system. And, it can be migrated to most other languages.
